

# What materials are available for the Ultimaker 3D Printers?

 We have a range of filaments and colours you can print with. We primarily print with PLA (Polylactic Acid) a fully biodegradable thermoplastic polymer consisting of renewable raw materials. Colours currently available are

- Black
- White
- Silver
- Pearl White
- Magenta
- Red
- Green
- Blue
- Orange
- Yellow

There are also some specialist materials available such as Flexible Plastic, Clear, Wood and ABS. Please contact the workshop to discuss these materials.
