# Woodwork Machine Room

## Essential Info

Students can use the Woodwork Room with staff supervision. Some of the machines can be used by students, others are operated by a technician.

All students must book a workbench to be in 3D workshop. Booking a workbench for a 3 hour slot gives you a space to work and access to all necessary tools, sundries and equipment with technical supervision and guidance.

You can book a workbench via the [Online Resource Booking \(ORB\)](#).

You must complete the online Health and Safety training on the ORB before you will be able to book a workbench. The training will appear when you try to book a workbench for the first time.
